To Whom It May Concern,

I am writing to wholeheartedly recommend Salma Mlika for any software engineering position she may pursue, especially roles involving artificial intelligence and Large Language Models. As Product Development Lead at GOMYTEACHER, I had the distinct pleasure of mentoring Salma during her software engineering internship from July through September 2025.

During her three-month tenure, Salma demonstrated exceptional technical proficiency and made significant contributions to our AI-driven platform. She worked extensively with Go Lang, developing robust continuous integration tools that streamlined our development workflow and significantly improved code quality across the team. Salma updated and enhanced our Next.js website with new features and improvements, demonstrating exceptional attention to user experience and performance optimization. Additionally, she took ownership of critical DevOps processes, implementing infrastructure improvements and quality assurance practices that enhanced our deployment reliability and system stability. Her work was not only technically sound but also well-documented and maintainable.

What truly sets Salma apart is her remarkable ability to learn quickly and adapt to new technologies and methodologies. She consistently delivered high-quality work ahead of schedule and showed genuine enthusiasm for tackling complex technical challenges. Her impeccable English communication skills, both written and verbal, facilitated seamless collaboration with our distributed team and ensured clear documentation of her work. Salma approached every task with professionalism, curiosity, and a solutions-oriented mindset that is rare to find in someone at this stage of their career.

I have worked with numerous engineers throughout my career at organizations including Amazon and Goldman Sachs, and I can confidently say that Salma ranks among the most talented and promising early-career engineers I have encountered. She will be a valuable asset to any team fortunate enough to work with her. I give her my highest recommendation without reservation.

Please feel free to contact me at salmen@hey.com or +44-7450-0421-63 should you require any additional information or wish to discuss Salma's qualifications in more detail.

Sincerely,

Salmen Hichri
Product Development Lead, GOMYTEACHER
