PROFILE

AI & Data Science engineering student with a scientific background, particularly interested in how data can solve real-life challenges, especially in healthcare. Hands-on experience in NLP, medical image classification and LLM / RAG systems, from data collection to deployed models. Fluent in French and English, and always keen to learn more.

EDUCATION

EPI Sousse — Engineering Degree in AI & Data Science *2024 – Present*
ISSAT Sousse — Bachelor's Degree in Computer Science *2021 – 2024*
Lycée Pilote de Zaghouan — Baccalaureate in Experimental Sciences *2021*

PROFESSIONAL EXPERIENCE

AI & Data Science Engineering Intern — Auzy Mental Health Jul – Sep 2026

- Built and curated a **22,000+ multilingual dataset** for suicide risk detection, with data-quality checks and gap analysis.
- Fine-tuned XLM-RoBERTa (FR/EN/AR), prioritizing recall to minimize missed cases: **95.9% EN, 99.1% AR, 97.5% FR**.
- Served the model through a **FastAPI** service with ONNX Runtime inference, containerized with Docker.
- Developed mood tracking (mood, intensity, sleep) and weekly/monthly analytics to support **therapists' clinical follow-up**.

Python · Hugging Face · Transformers · XLM-RoBERTa · NLP · ONNX Runtime · FastAPI · React · Node.js · Docker

AI & Data Science Engineering Intern — EPI Digital Sousse Apr – Jun 2026

- Designed a **modular ML platform** supporting classification, regression and clustering through a guided 6-step pipeline.
- Automated preprocessing, imbalance handling, model selection and **hyperparameter tuning** (Grid / Random Search).
- Built a **Streamlit interface** to compare algorithms and visualize metrics (confusion matrix, feature importances).

Python · Scikit-learn · XGBoost · imbalanced-learn · Pandas · Streamlit · Matplotlib

Software Engineering Intern — GoMyTeacher (GoMyCode & InstaDeep) Jul – Sep 2025

- Developed a **full-stack waitlist system** using Next.js, TypeScript and Go, integrated with Mailchimp and HubSpot.
- Implemented **CI/CD** with GitHub Actions, automated testing and Google Chat alerts.
- Integrated **PostHog analytics** to support data-driven UX improvements.

Go · TypeScript · Next.js · GitHub Actions · PostHog

Full-Stack Developer Intern — FORIP Jan – Jun 2024

- Contributed to a **cloud PaaS/DBaaS platform** for deploying applications and databases with configurable resources.
- Automated application deployments using **Docker and Jenkins** CI/CD.
- Implemented **Grafana and Prometheus** monitoring to track system performance and stability.

Django REST · Next.js · Docker · Jenkins · Grafana · Prometheus

AI PROJECTS

Skin Analyzer — Medical Image Classification GitHub

- Fine-tuned MobileNetV3 (PyTorch) on 9,770 images to classify **5 skin conditions** with transfer learning and data augmentation, reaching **96.06% validation accuracy**; integrated into ParaTrack.

PyTorch · MobileNetV3 · Transfer Learning · Computer Vision

ParaTrack — AI Product Intelligence for Pharmacy & Skincare Products GitHub · Live Demo

- Built a price comparison engine scraping **15,000+ pharmacy and skincare products** from 3 retailers, matched with RapidFuzz.
- Developed an LLM-powered **RAG chatbot** (Groq LLaMA 3.3, ChromaDB) for product search, integrating Skin Analyzer.
- Forecasted prices (Prophet), detected **price-drop anomalies** (Isolation Forest) with alerts; deployed on Vercel + Render.

Web Scraping · LLM · RAG · ChromaDB · Flask · PostgreSQL · Prophet · Scikit-learn

HDD Failure Prediction — Early Detection of Hard Drive Failures GitHub

- Predicted failures 15 days ahead from **12M+ rows** of 33 time-series attributes, handling class imbalance; compared CNN-LSTM, GRU and Transformer, achieving **95.7% recall** on a held-out future period.

TensorFlow · CNN-LSTM · GRU · Transformer · Pandas · PyArrow

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, TypeScript, Go
ML / Deep Learning: PyTorch, TensorFlow, Scikit-learn, XGBoost, Transfer Learning, Imbalanced Learning
NLP / LLM: Hugging Face Transformers, XLM-RoBERTa, AraBERT, LLaMA, RAG, ChromaDB
Data: Pandas, NumPy, PyArrow, Matplotlib, Seaborn, Power BI, Hadoop — **Databases:** PostgreSQL, SQLite, MongoDB
APIs / Web: FastAPI, Django REST, Flask, Next.js, React, Streamlit
MLOps / DevOps: ONNX Runtime, Docker, Jenkins, GitHub Actions, AWS, Linux

CERTIFICATIONS

- Google Cloud — Build and Train ML Models (2025) View credential
- Microsoft Certified: Azure Fundamentals (AZ-900) (2026) View credential
- Microsoft — Power BI Data Analysis (2025) View credential
- University of Michigan — Using Python to Access Web Data (2025) View credential
